

Guessing Game - What am I?

Fauna Questions:

1. I have wings and so I can fly. I mainly nest in coastal cliffs but I can also be found in urban areas, especially in the winter. I eat insects, small reptiles, and fruits. The colour of my body is blue. What am I?
2. I am a mammal. I am commonly found in large gardens or fields close to where humans live. I eat insects, snails, slugs and earthworms and I forage for them mainly at night. I am a bit spiky and roll into a ball when danger is near. What am I?
3. I am the only carnivorous mammal in Malta. I have a long thin body with short legs and can squeeze through tight gaps. My food is rabbits, chicken-sized birds, rats and mice. What am I?
4. I am an insectivorous mammal. My diet consists of worms, snails, slugs, soft-bodied insects and larvae and I forage regularly but mostly at night. I am very small and only weigh 2 grams. I have a long snout. What am I?
5. I have wings and I can fly. I roost during the day in dark caves or narrow cracks in buildings. I am nocturnal (hunt at night) and emerge at sunset to feed. I only eat insects, mainly moths and mosquitoes. What am I?
6. I am the only native amphibian on the Maltese Islands. My colour is brown, with small darker patches, that look like they have been painted on. I feed on a variety of small insects like flies, bugs and mosquitoes. What am I?
7. I am a reptile. I can grow to over 100cm long. I am pale grey with reddish-brown spots or strips along my body. I am slim whip-like build and as it is non-venomous. I feed on small mammals like shrews and mice and sometimes small reptiles like lizards. What am I?
8. I am a reptile. I have a flat body with quite a long tail which sometimes falls off. I like to sunbathe. I mainly hunt at night (nocturnal) to eat mosquitoes, moths and insects which are attracted to light. What am I?
9. I am a reptile. I have the ability to change colour which helps me to be camouflaged. I have a very long tongue which I use to eat flies, beetles and other insects. What am I?
10. I can fly and I have wings. I have large yellow and black patterned wings. I have two antennae to find pollen. I like to eat the Fennel plant. What am I?
11. I can fly and I have wings. I live with others like me in large colonies. My body is dark in colour with orange stripes. I build my nests in walls or tree trunks. I produce something sweet which humans like to eat. What am I?
12. I have eight legs. I catch my prey by jumping on it. I like to eat mosquitoes, flies and other insects. I am found inside buildings but also in the countryside. What am I?
13. I do not have any legs. I mainly come out after it rains. I move quite slowly and I leave a trail behind me. What am I?
